

5NINES DATA

Co-location

5Nines, offers a unique physical location allows direct access to the main fiber network serving southeastern Wisconsin

Located just off the Capitol square in downtown Madison, 5Nines Data offers 99.999% infrastructure uptime guarantee, 24x7 physical building security, surveillance systems, dry-pipe fire protection, UPS and backup generator facilities, and independent air-conditioning systems.

Redundant circuits with separate transformers and substations provide electrical service and set the foundation for 5Nines' uptime guarantee.

5Nines also offers a full set of services to complement customer co-location including server and data backup, DNS, Email management, and secure VPN remote access

5Nines Advantages

- ⊗ Dual electric grid
- ⊗ POP for multiple providers
- ⊗ OC-192 Bandwidth
- ⊗ Dry-pipe fire suppression
- ⊗ Temperature and humidity control
- ⊗ Customer workspace
- ⊗ 99.999% Uptime
- ⊗ 24/7 technical support
- ⊗ Multiple levels of security

Technology at the forefront: Co-location highlights

Co-location at 5Nines' Data Center is a smart decision:

- ⊗ **Powered to the teeth:** Redundant circuits with separate transformers and substations provide electrical service and set the foundation for 5Nines' uptime guarantee.
- ⊗ **Extreme Networking:** Through 5Nines' unique physical location in Network 222 and physical proximity and access via existing conduit to fiber lines at the street, 5Nines has network and telecommunication service opportunities to provide direct access to: Charter, US Signal, AT&T, Norlight, TDS Telecom, TDS Metrocom, Spiralight, Global Crossing, CenturyTel, UW/WiscNet, and others.
- ⊗ **Security:** Includes 24/7 building security, key-only access through main door and biometric entry to the data center, employee escorts, and motion-detection video cameras.
- ⊗ **Monitoring.** Network, internet and environmental monitoring is conducted 24/7 both internally and externally by 3rd party providers to ensure fail-proof operations.
- ⊗ **Full Service:** 5Nines also offers a full set of services to complement customer co-location including server and data backup, DNS, Email management, and secure VPN remote access
- ⊗ **Dedicated Servers -** Another option entirely is to let us design, build and manage your very own server colocated at 5Nines.

Price Model that's hard to beat

- ⊗ \$15 per RU
- ⊗ \$600 per Rack
- ⊗ \$28 (for electrical & cooling)

Co-location fees includes: electrical and cooling charges, UPS battery back-up, and in-building generator service for 99.999% power availability

Additional Services - monthly	
Network Connectivity	\$25 - port (1 port included)
KVM	\$25 - device
Network storage	\$1 - 1GB
Off-site back-up	\$2 - 1GB
Ping monitoring	included
System monitoring	\$75 - device
DNS maintenance	Included
Email Management (incl. spam filtering)	\$25 - 50 accounts
Systems management	Call for quote
Website Availability Monitoring	\$100 per site

Speed, Stability and Security
