

5NINES DATA

Dedicated Servers

We build, service and manage your dedicated server

The 5Nines offers dedicated hosting on high-end web servers for web application developers, web hosting providers and companies needing high performance, security and control for their web hosting needs. Dedicated servers can be configured with various operating systems and components tailored to fit any specific need. 5Nines Dedicated Web server offerings are a totally managed solution that take away the burden of infrastructure support and management and allow our clients to focus solely on their core business.

Located just off the Capitol square in downtown Madison, 5Nines Data offers 99.999% infrastructure uptime guarantee, 24x7 physical building security, surveillance systems, dry-pipe fire protection, UPS and backup generator facilities, and independent air-conditioning systems.

Redundant circuits with separate transformers and substations provide electrical service and set the foundation for 5Nines' uptime guarantee.

5Nines Advantages

-  Dual electric grid
-  POP for multiple providers
-  OC-192 Bandwidth
-  Dry-pipe fire suppression
-  Temperature and humidity control
-  Customer workspace
-  99.999% Uptime
-  24/7 technical support
-  Multiple levels of security

Service Features Highlights

Choice of server system and specification	<input checked="" type="checkbox"/>
Choice of operating system: Windows Server , Redhat Enterprise or FreeBSD	<input checked="" type="checkbox"/>
Choice of database: SQL Server 2000, MySQL	<input checked="" type="checkbox"/>
Choice of control panels: cPanel, Helm or Plesk	<input checked="" type="checkbox"/>
11 IP addresses, upgradeable to 59, 73 GB backup, Firewall service, Gold Plan.	<input checked="" type="checkbox"/>
2000GB Bandwidth, upgradeable to 3000GB	<input checked="" type="checkbox"/>
Urchin 5.0 web analytics	<input checked="" type="checkbox"/>
40GB Tape Backup, upgradeable to 80GB or 120GB	<input checked="" type="checkbox"/>
Firewall service	<input checked="" type="checkbox"/>
24-Hour Technical Support	<input checked="" type="checkbox"/>
Guaranteed Uptime	99.9%

Product Plans include:

Ping Monitoring	<input checked="" type="checkbox"/>
Network Based IDS	<input checked="" type="checkbox"/>
24/7/365 Onsite Hands and Eyes	<input checked="" type="checkbox"/>
Online Support Portal	<input checked="" type="checkbox"/>
Penetration Testing Service	optional
Host Based IDS	<input checked="" type="checkbox"/>
Server Anti-Virus Protection	optional
Dedicated Support Engineers	optional
Direct Support Escalations	optional
O/S Updates and Patches	<input checked="" type="checkbox"/>
O/S Hardening Services	optional
Service, System and Process Monitoring	<input checked="" type="checkbox"/>
Server Applications Support	optional
On-Demand Vulnerability Assessments	<input checked="" type="checkbox"/>
Monthly Enterprise Reporting	optional
Centralized System Event Monitoring	<input checked="" type="checkbox"/>
Named Dedicated Technicians	optional
Systems Administrative Service	<input checked="" type="checkbox"/>
