

5NINES DATA

# Advanced Windows Hosting

## 5Nines delivers high-end Advanced Windows Hosting with SQL

5Nines Data is located in Madison's only carrier-neutral facility, Network 222. Naturally, we take advantage of the strong carrier presence by connecting our Cisco-powered network to multiple national backbones, blending the best paths available from each. We don't stop at transit, though; the 5nines network is also peered with local and regional networks, giving our clients unparalleled access to users, both nearby and abroad.

Our attention to availability doesn't stop at the network. The 5Nines facility sits atop the downtown dual power grid, which sets us apart from other locations in the city. This grid was constructed specifically to provide stable electrical service to state and federal government buildings. This sets the foundation for 5Nines' uptime guarantee.

5Nines is an established IT solutions and services organization with experienced personnel in data center operations, networking, internet delivery, hosting applications, and Oracle and SQL database development and administration. Our customer base includes companies in healthcare, insurance, media, manufacturing, technology, legal and governmental agencies. Let our experts help you reach your customers and conduct business in a flash!

### 5Nines Advantages

- 1 GB Disk Storage
- 25 GB bandwidth
- POP3, SMTP, IMAP
- 25 MB E-mail accounts
- AWSTATs web statistics
- Conditioned environment
- 99.999% Uptime
- Technical support

### Hosting highlights

5Nines has extensive experience with both Linux and Microsoft hosting environments. 5Nines currently provides shared hosting services on several different servers that utilize MySQL and SQL databases, PHP and CGI scripting, ASP components, and secure FTP connections.

- Bandwidth:** Norlight's point of presence (POP) for Madison resides next door to 5Nines. It offers an OC-192, SONET ring (redundant) connectivity to local and regional networks and the internet via multiple access points (multiple tier-1 carriers), and load balancing.
- Security:** Includes 24/7 building security, key-only access through main door and biometric entry to the data center, employee escorts, and motion-detection video cameras.
- Monitoring.** Network, internet and environmental monitoring is conducted 24/7 both internally and externally by 3rd party providers to ensure fail-proof operations.
- Full Service: Full Service:** 5Nines also offers a full set of services to compliment hosting customers including daily server and data backup, DNS & Email management, and and remote email access
- Domain Registration:** 5Nines is partnered with TuCows, one of the oldest and largest internet registrars. Domain names available include: .com, .org, .biz, .info, .us, .net, co.uk and other foreign domains.
